

## How can parents help?

At Ormesby, we believe that working together with parents is hugely beneficial to a child's development and their attitude towards education.

You can support your child at home through:

- Spending time exploring the natural environment and discussing what you observe together
- Visiting local attractions – Guisborough Forest, Flatts Lane Country Park, Newham Grange Farm, Life Centre - Newcastle, Wynyard Observatory, National Railway Museum - York, Natures World - Stockton, Sealife Centres etc.

The following websites can be accessed to support your child's learning:

- Marvin & Milo – fun experiments to try at home
